CUSTOM COLORS ARE AVAILABLE

OPTIONS

VALANCE PLUS
Is an optional roll down drop valance. This valance is great for extra shade on western exposures when the sun is low on the horizon. Available with acrylic or mesh fabrics. Manual or motorized control.

LED LIGHT KITS
LED Light kits for awning arms & front bar. Warm white and cool white colors. Dimmable, multi channel remote.

XP CROSSOVER ARMS
The Sunair® XP offers the ability to overlap the arms in order to fit larger projection arms onto a narrow frame. This cross-arm version is available when the desired projection exceeds the width.

MOTORIZED OPTIONS:

Remote Controls

Ondeis Wirefree Sun & Rain Sensor

Soliris RTS 24V Kit Sun & Wind Sensor

Eolis 3D Wirefree RTS Wind Sensor

Altus RTS motors with plug-in cord

myLink RTS Smartphone & Tablet interface

The TaHoma Switch control up to 60 Somfy products

By motorizing your Sunair® awning you can extend and retract your awning effortlessly. In fact, motorizing your awning will increase your usage of the product and overall satisfaction. The motors also do not require any maintenance.
With a flick of a switch or remote, the awning will extend or retract automatically. Somfy myLink or TaHoma to control right from your smartphone or tablet interface. A standard wall switch or RTS remote control is available with the optional SOMFY Plug-In motors, eliminating the need for an electrician.

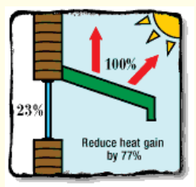
EXPAND YOUR OUTDOOR LIVING SPACE

SUNAIR® retractable lateral arm awning is your ideal shading solution for decks and patios. They can be conveniently mounted on the wall, soffit or roof for additional headroom. With a simple hand crank or the convenience of an optional motor, your awning will instantly protect you and your family from the elements. On cloudy days or when it's not in use, your awning is completely self-storing. This eliminates the need for seasonal removal and storage. With over 40 years of experience, SUNAIR® has led the industry by engineering the most durable arm design, that use the strongest materials.

ADD VALUE TO YOUR HOME:
A SUNAIR® Lateral Arm Awning offers the ideal solution for creating a comfortable outdoor environment the whole family can enjoy. Imagine staying cool on your deck and protecting your family from the sun's harmful rays. Finally you can enjoy cookouts and entertaining the way it is meant to be with a SUNAIR® Retractable Awning.



ENERGY SAVINGS:
You can reduce sunlight and glare through your windows by up to 94% and reduce heat gain by as much as 77%. Awnings can reduce cooling energy by as much as 17% in moderate climates. You can also reduce your utility bills.

SUN PROTECTION:
A SUNAIR® awning provides you and your family with 99% UV protection, while also protecting furniture and carpeting from fading. Now you can enjoy the outdoors without worry.

SUNAIR® FEATURES AND BENEFITS

	ARMS All arm, shoulder, and elbow parts under stress are made of forged aluminum. All arms 8'-7" and above use three heavy duty steel springs.	Forged aluminum arm components are stronger than all die castings or extrusions resulting in a stronger awning against the elements
	FLEXIBILITY Sunair® uses only the strongest materials yet is engineered for flexibility with a unique two way movable front arm attachment.	Our unique two way movable front arm attachment relieves strain, increases flexibility and strength in the arm which reduces damage.
	**ELBOW** The Sunair® uses twin high quality stainless aircraft cable covered in a vinyl PVC sleeve. The hinge is triple angled with an elliptical cable radius.	Twin covered cables are far superior to a single cable, as cable wear is reduced, allowing better arm and fabric tension and durability. The elliptical cable radius increases tension as the awning extends.
	PROFILES & PAINT All extrusions and components are exclusively made of the highest quality aluminum. All extrusions and aluminum parts all electro statically powder coated.	Aluminum extrusions are strong, yet will not corrode over time like steel. Powder coating is ideal for outdoor products, it holds up better against the elements, resisting cracking and peeling.
	GEARS Manually operated Sunair® units use a heavy duty 4:1 ratio bevel gear with a stop. A 8:1 gear is used on larger width units.	The German gear is of the highest quality available. The stop eliminates fabric damage due to over rolling.
	THREAD All fabrics are sewn with Tenara® thread. This thread is manufactured from GORE-Tex, and is clear, making it nearly invisible.	Tenara® thread is made of fluoropolymer and is UV-resistent, weather-resistent, and immune to UV degradation. The clear thread is nearly invisible on most fabric colors.

SUNAIR® FABRICS AND MESH

Choose from our exclusive **PARA Tempotest®** and **Sunbrella** fabric collections. Hundreds of premium grade, 100% acrylic, solution dyed solid and striped fabrics to choose from.

Sustainable & Built to Last
Our solution-dyed acrylic fabrics deliver eco-friendly durability and long-lasting color, standing up to harsh outdoor and marine conditions with minimal upkeep.

Color That Never Quits
Color is locked into every fiber for superior fade resistance and vibrant longevity with outstanding colorfastness.

High-Performance Comfort
Acrylic fabric breathes better, looks better, and resists fading, mildew, stains, and moisture thanks to its water-repellent finish.
